Projects

Portfolio Site

- Personal portfolio page built using HTML, CSS, JavaScript, BootStrap, and JQuery.
- Showcases understanding of frontend design principles utilizing base CSS, Third-party CSS frameworks (BootStrap), and JavaScript.
- Live site hosted via Netlify: www.NormPark.com

N.P Movies

- Created a movie/show search app utilizing OMDb API to display movies/shows via real time searching using react hooks
- Allows users to create a favorite movies/shows list which are then saved to local storage
- Showcases understanding of clean, minimal frontend design via React.js and Bootstrap
- Live app hosted on Heroku (<https://npmovies.netlify.app/>) and source code on Github.

BlogApp

- Created full stack blog web application utilizing JavaScript | React.js | Node.js | MongoDB | Express
- Utilized full server side rendering using CRUD operations
- Built and organized routes and url end-points
- Sent and received data using a database via Node.js and MongoDB
- Signed up and authenticated users using SALT and hashing to safely and securely store user data
- Used cookies to authenticate user sessions and permissions for viewing, editing, and deleting blogs. Live app hosted via Railway (<https://np-blogapp.up.railway.app/>) and source code on Github
